Now a major motion picture, Kevin Kwan's 'Crazy Rich Asians' is the first of the trilogy. When Rachel Chu, a professor of Economics from the Stanford University, agrees to spend the summer in

Singapore with her longtime boyfriend, Nicholas Young, she has no idea that Nick grew up in a house that looks like a palace, and that she will ride in more private planes than cars. Revolving around the families of 'crazily rich' Chinese expats, the sparkly story is told from the perspectives of the main characters in locations around the globe including the United States, London, Singapore, Hong Kong, Shenzhen, Sydney and more.

While most view Crazy Rich Asians as a cross between 'Cinderella' and 'Pride and Prejudice', it is also a fun culture clash comedy - the book has interesting footnotes explaining slangs, customs and traditions from the East. In fact, we, as Chinese ourselves, are more than familiar with those; yet this particular feature only adds to the fun of reading.
